

PRE BONDED HAIR EXTENSIONS

HOW TO APPLY

Pre-glued hair extensions are easy to apply since the glue is already in place. At the end of the hair is a protein tip shaped like a fingertip. You melt the glue with the fusing tool. Save time by not having to do any cutting or weft removing. Shedding is almost eliminated. Glue section is much smaller and lays flatter. Less glue means less breakage and tension. Hair can be reused by removing the pre tipped piece with remover, cut off the glue tip and use your glue gun with adhesive sticks to reapply.

The part of the hair you are adding extension to needs to be free from oils or any slippery coating. We strongly recommend washing client's hair and not adding conditioner before applying extensions.

Step 1

Start sectioning client's hair from bottom to top.

Step 2

Insert template to root to protect scalp from heat.

Step 3

Twist strands to ease placing pre tipped hair.

Step 4

Place Pre tipped hair under client's hair, holding with one hand.

Step 5

Place hair connector Tool under hair.

Step 6

Pinch smoothly for about 3 seconds to melt and smear glue into every hair stand.

Step 7

Roll fused part with fingers and try to close tightly.

Step 8

Finished - Do not shampoo or condition hair within 24 hours.

REMOVAL PROCESS

Step 1

Apply 3 - 4 drops of Remove it to glued part

Step 2

Using Flat Pliers, pinch the fused part 5 times to break glue.

Step 3

Separate pre tipped hair from client's hair.

Step 4

Use comb or shampoo to remove glue residue
